## **BRIEF SUMMARY OF THE EVENT:**

The Department of Computer Science organized a Power Seminar on 'Future of Technology', in association with ICT Academy on 22<sup>nd</sup> January, 2022 from 11:00 AM - 01:00 PM online on Google meet. The participation was from various departments of the college and response from the participants was in a deliberate and positive way.

**Mr. Ashutosh Sharma** "Technology today is a binding factor between people and work", says entrepreneurial Business HR Leader Mr. Ashutosh Sharma in the power seminar. Starting with an exciting intro to the future of technologies by citing Michael Crichton's 1969 novel *Andromeda Strain* and Elon Musk's Neuralink chip idea he explained that there is a candid stark difference between Digitalisation & Technology. Being a Tech Enthusiast, he proposed the idea of disruptive leadership to puzzle out the disruptions that are indelible with technological enhancements. He also explained that knowing and implementing technology are two different things and besides boosting the work efficiency tech helps us to make informed decisions.

**Mr. Unnikrishnan Rajappan** gave a glimpse of various emerging future technologies including Body implant Hologram for the future of communication, education and healthcare, Hyperloop as future of Transportation, AI, Robotics and IoT in context with Smart clothes, Space Research, Gaming, Cyber Security, Construction and businesses. Appreciating the unprecedented boost in technologies in every field, he also mentioned the fact that tech can be disastrous too, so we should use it in wise and sustainable fashion.

At the end of the seminar participants also shared very good feedback on the organization of event, and also shared their views on the topics which should also be covered in the seminar in near future.
