#### 7. BRIEF SUMMARY -

THSTI (Translational Health Science and Technology Institute) organized a workshop on IPR titled "Roadmap for patent creation" on 22<sup>nd</sup> August 2022 (10 am to 1:00 pm) in collaboration with cell for IPR promotion and management (CIPAM). The students at the workshop were introduced about the aim of the workshop and importance of patents. We were explained about the inventions which can't be patented under the Indian Patents Act. A brief and yet the most detailed information about types of IPR and patenting process especially PCT application was given. This was followed by the visit to the BioNEST (Bio incubators Nurturing Entrepreneurship for Scaling Technologies Scheme). It provides shared and independent incubation facilities such as wet & dry Lab space, office space, central instrumentation facility, well equipped meeting rooms, seminar rooms and video conferencing facility to Innovators and Startups at very affordable costs. Students were welcomed warmly and were given the opportunity to explore the

labs. Facilities like AKTA purification system, Mass spectrometry; ultracentrifuges; animal cell culturing, ELISA reader and many more were observed and explained to the participants. Pilot scale fermenter was also explained by the incubatee to us. We were also informed about the upcoming workshops and trainings at the BioNEST.
