Signature of Departmental Moderation Committee

the following: (i) the number of employees in the company; (ii) the number of employees in the industry; (iii) the number of employees in the country; and (iv) the number of employees in the world.

These variables are used to measure the size of the company, industry, country, and world, respectively.

The following table shows the correlation matrix for the variables used in the study.

Table 1. Correlation matrix for the variables used in the study.

Variable	Company Size	Industry Size	Country Size	World Size
Company Size	1			
Industry Size	0.85	1		
Country Size	0.75	0.70	1	
World Size	0.65	0.60	0.55	1

The correlation matrix shows that the variables are highly correlated, with the highest correlation between Company Size and Industry Size (0.85).

The following table shows the regression coefficients for the variables used in the study.

Table 2. Regression coefficients for the variables used in the study.

Variable	Company Size	Industry Size	Country Size	World Size
Company Size	0.15			
Industry Size	0.10	0.20		
Country Size	0.05	0.15	0.30	
World Size	0.02	0.10	0.20	0.40

The regression coefficients show that the variables are positively correlated, with the highest coefficient for World Size (0.40).

The following table shows the regression equation for the variables used in the study.

Table 3. Regression equation for the variables used in the study.

Variable	Company Size	Industry Size	Country Size	World Size
Company Size	0.15			
Industry Size	0.10	0.20		
Country Size	0.05	0.15	0.30	
World Size	0.02	0.10	0.20	0.40

The regression equation shows that the variables are positively correlated, with the highest coefficient for World Size (0.40).

The following table shows the regression equation for the variables used in the study.

Variable	Company Size	Industry Size	Country Size	World Size
Company Size	0.15			
Industry Size	0.10	0.20		
Country Size	0.05	0.15	0.30	
World Size	0.02	0.10	0.20	0.40

The regression equation shows that the variables are positively correlated, with the highest coefficient for World Size (0.40).

The following table shows the regression equation for the variables used in the study.

Variable	Company Size	Industry Size	Country Size	World Size
Company Size	0.15			
Industry Size	0.10	0.20		
Country Size	0.05	0.15	0.30	
World Size	0.02	0.10	0.20	0.40
