Brief Summary of the Event :

The seminar organized by the Department of Mathematics, titled **"The Intelligence Equation - Solving Everyday's Challenges with AI,"** was a hotbed of excitement for 150 enthusiastic students. Mr. Basant Kumar Mishra and Dr. Sandeep Bhatt recognized the students' dedication and presented personalized moments, sparking appreciation and motivation. Dr. Rajan Gupta delved into his tenure at Deutsche Telekom, revealing the telecom giant's expansive customer base, global footprint in over 50 countries, and staggering financials. He highlighted groundbreaking tech advancements across healthcare, manufacturing, finance, and more sectors. Dr. Gupta clarified the derivative equation with practical examples of feature vectors and scatter plots.

He further captivated the audience with insights on innovative AI models designed for specific tasks and discussed AI's transformative roles in productivity, text processing, and creative fields. Early AI adopters like Bain and Company, JP Morgan, and Khan Academy were highlighted for their forward-thinking AI applications. Dr. Gupta didn't shy away from addressing the elephant in the room: the challenges of AI, including hallucinations, ethical usage, data privacy, and the necessity for skilled employees. The seminar ended with a vibrant discussion on AI's vast potential and its bright future.
