

# Student Feedback Report Analysis

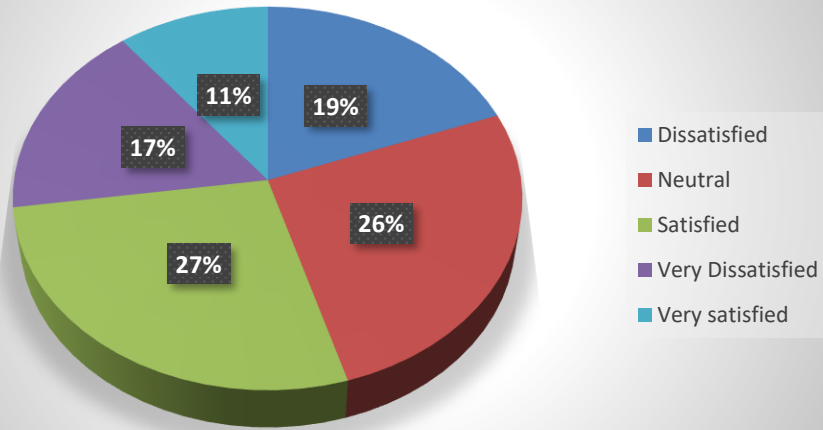

2023-24

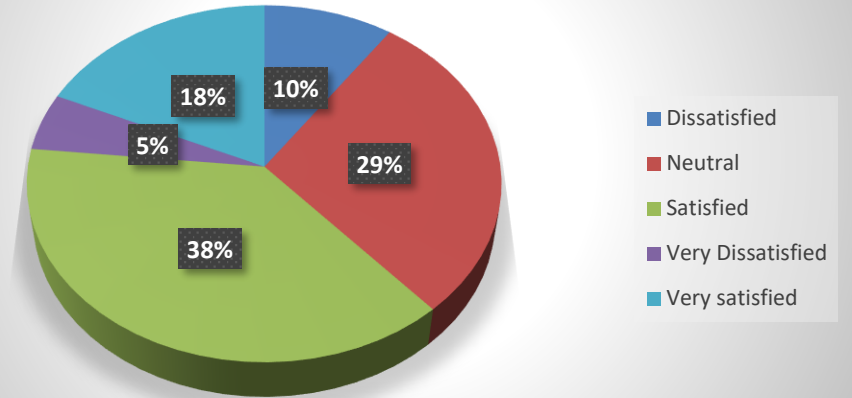

# Part-1

## Academic Resources (Faculty) and Academic Activities

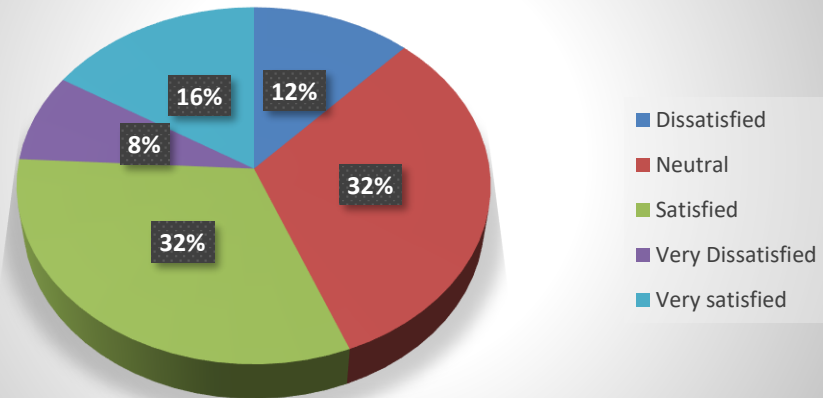

[Timetable]

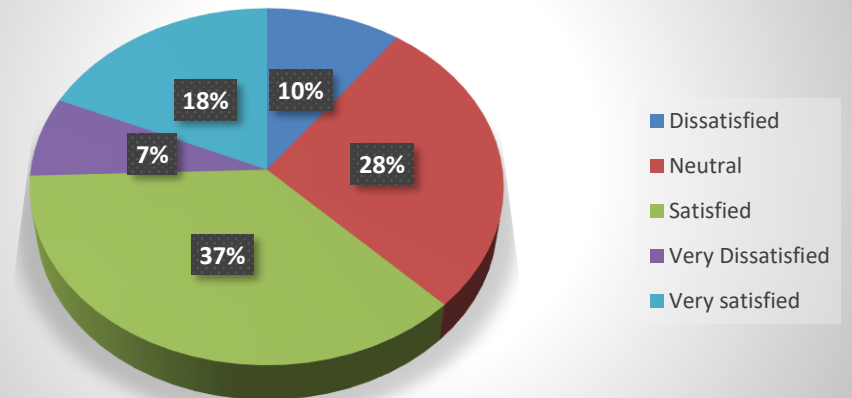

[Curriculum delivery: Linking Theory with Examples and Practices]

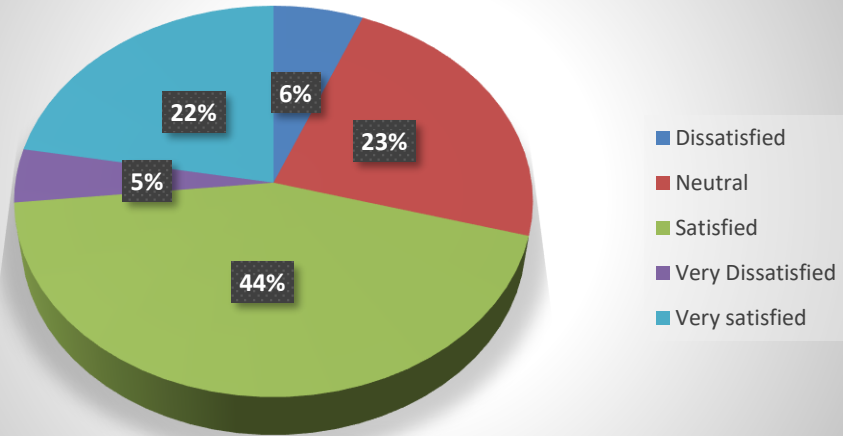

[Encouragement for Out of the Box and Innovative Thinking]

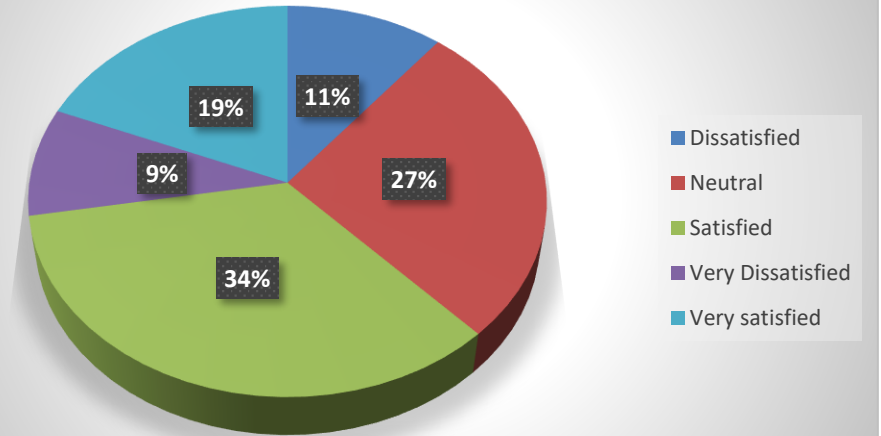

[Use of Teaching Aids and ICT in the Class to Facilitate Teaching]

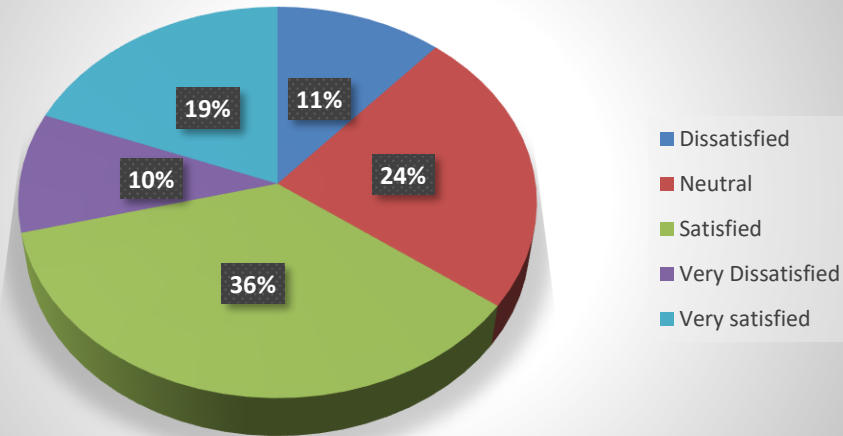

[Expertise of the faculty for the course]

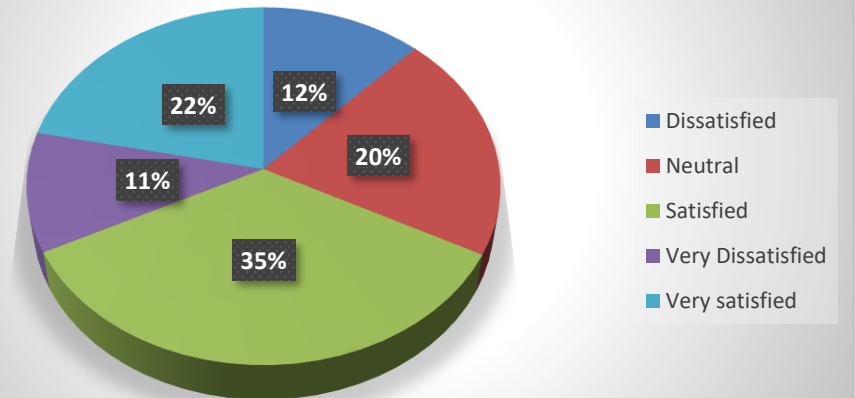

[Timely Syllabus completion of the courses]

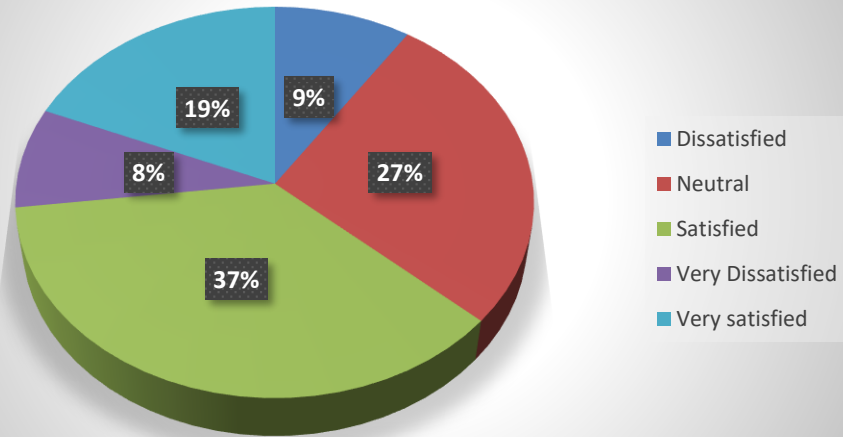

[Internal Assessment Process]

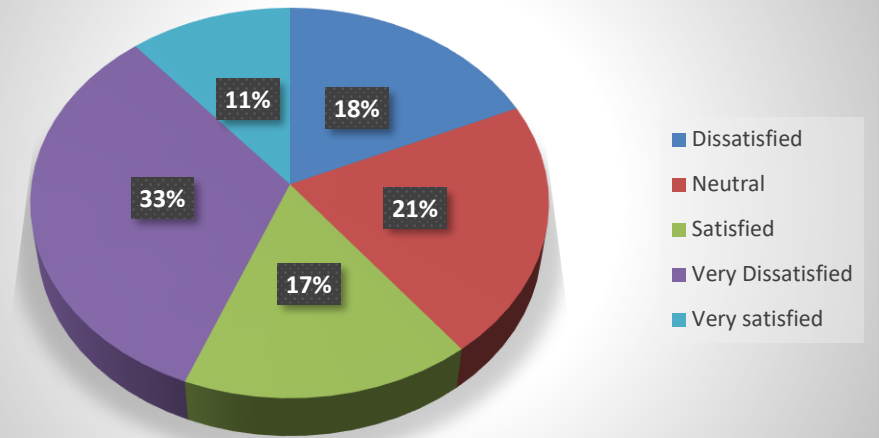

[Sufficient course choices were given for GE,SEC, DSE, VAC courses]

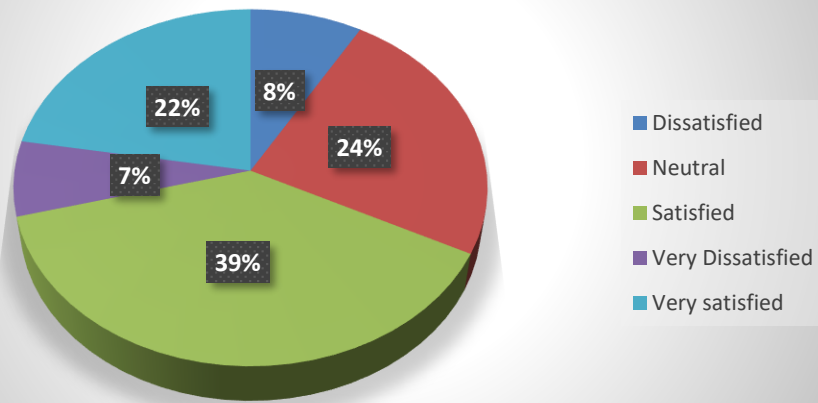

[Remedial/doubt clearing classes]

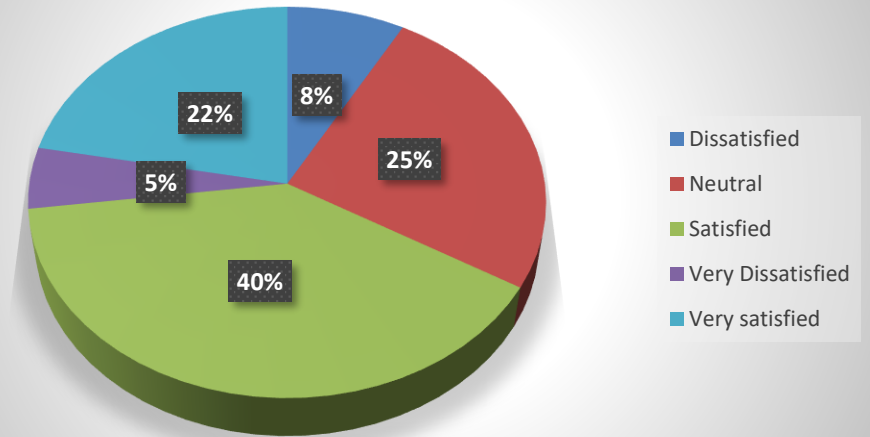

[Field trips]

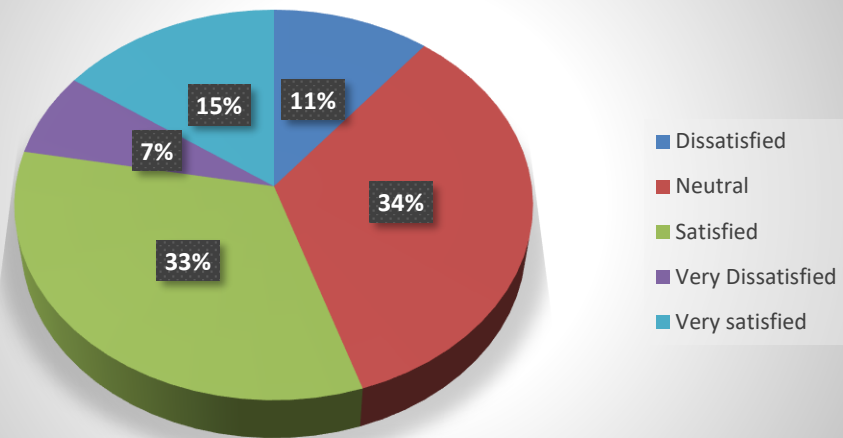

[Seminars/Conferences/Workshops related to courses of study are organised]

[Overall Learning Experience with the faculty]

[Hands on Training for Academic Enhancement]

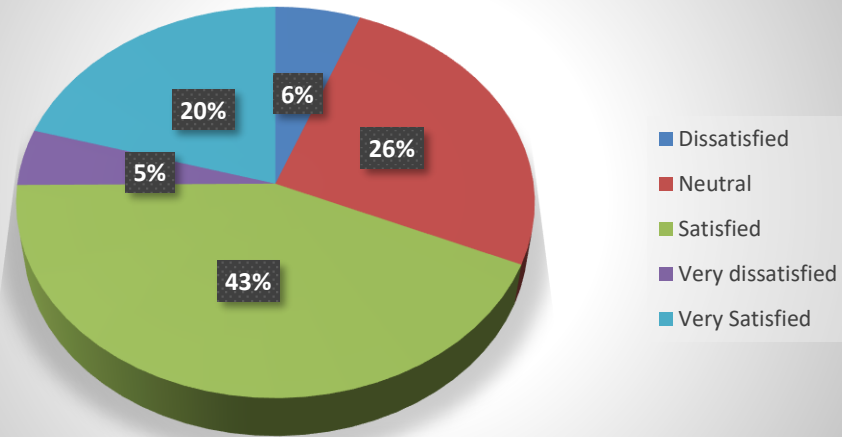

**Part-2**

**Co-Curricular**

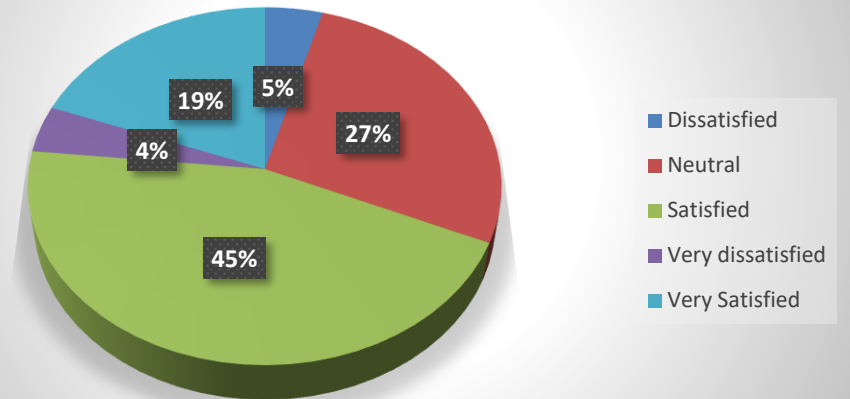

**and**

**Extra-Curricular related**

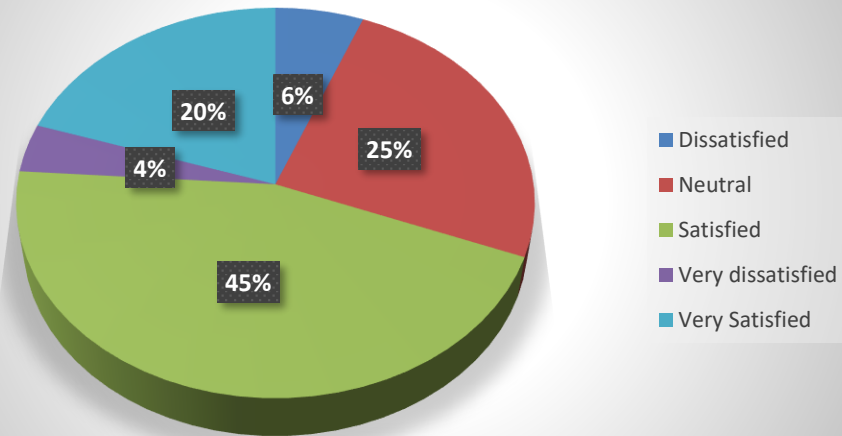

[Sufficient societies for extra and co- curricular activities.]

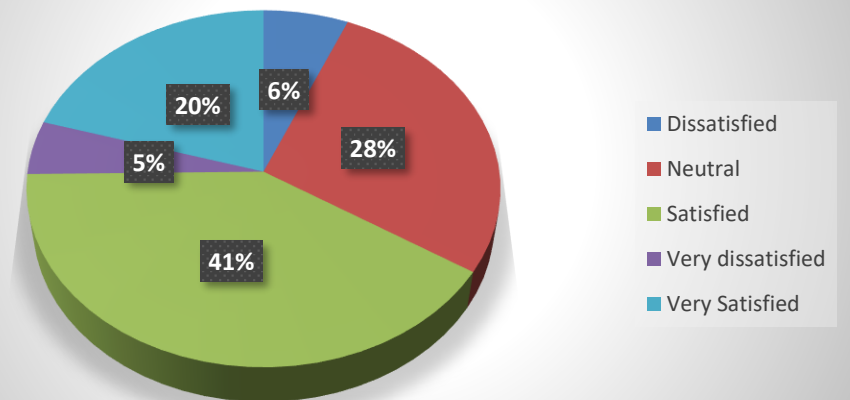

[The purpose for which events (workshops, seminars) are hosted is duly met]

[The events hosted by societies are adequate ]

[Ample opportunities to participate in the extracurricular activities.]

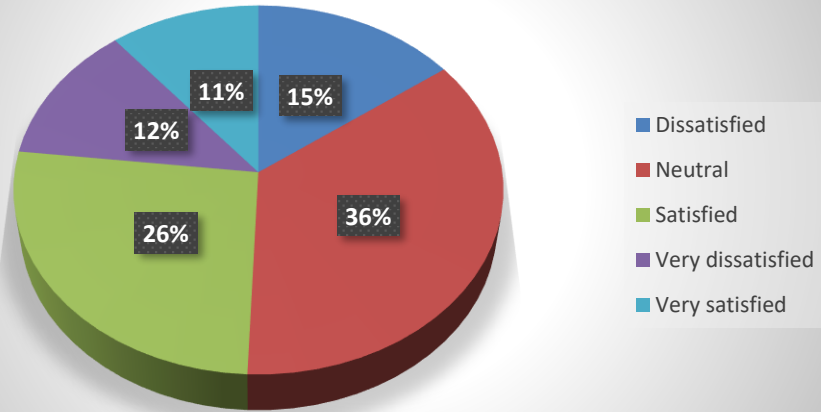

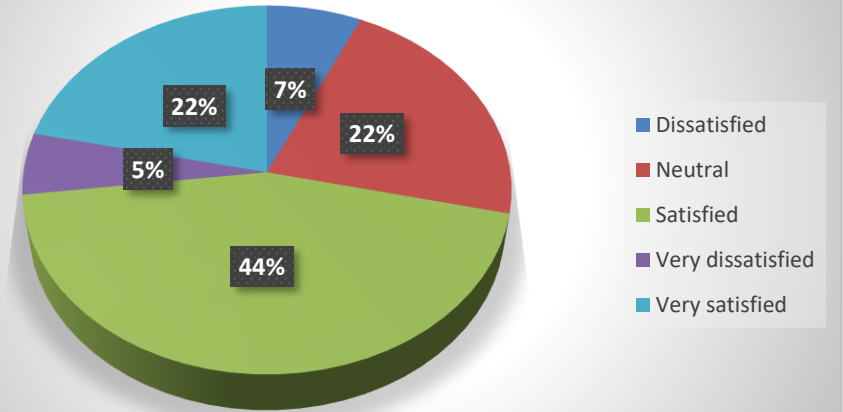

## **Part-3**

# **Infrastructure Facilities**

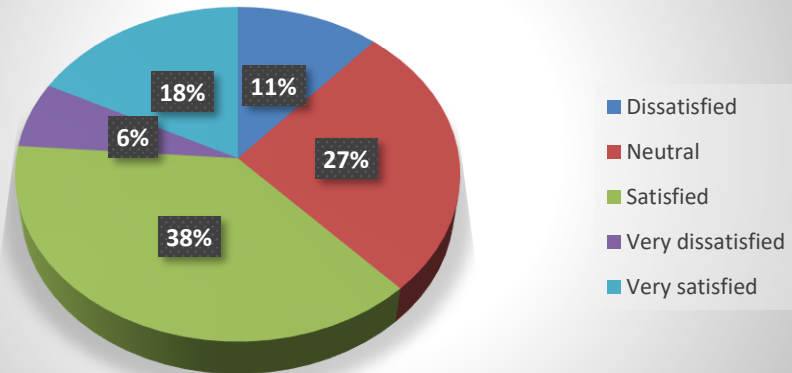

Infrastructure Facilities Sports Facilities

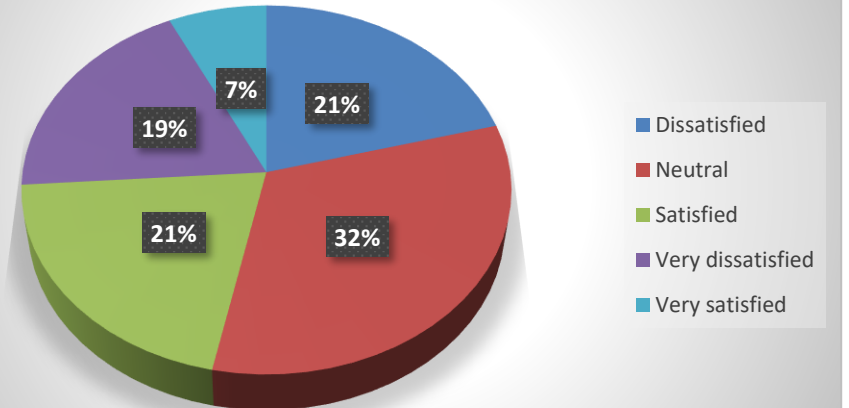

Infrastructure Facilities [Library Facilities]

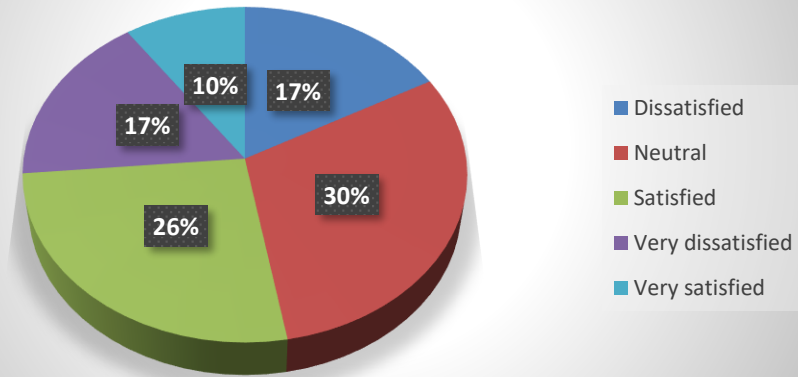

Infrastructure Facilities [IT facilities (availability of projectors, computers and wifi related)]

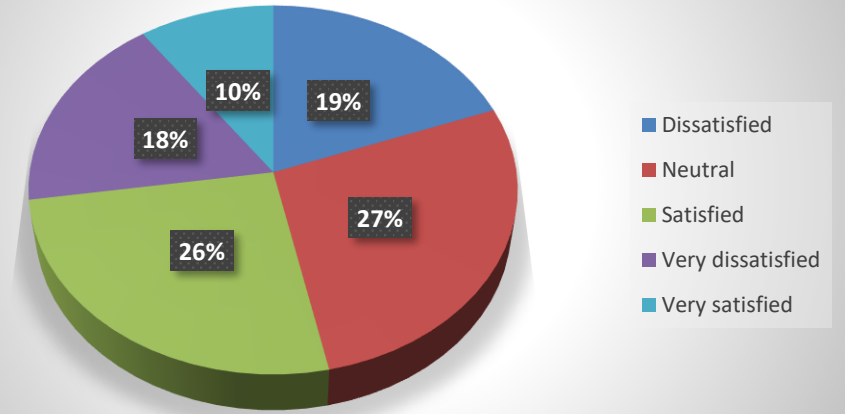

Infrastructure Facilities [Canteen food]

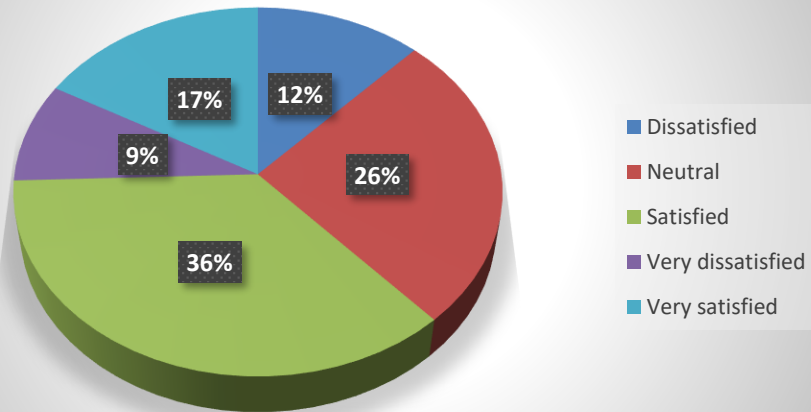

Infrastructure Facilities Classrooms are spacious and well ventilated

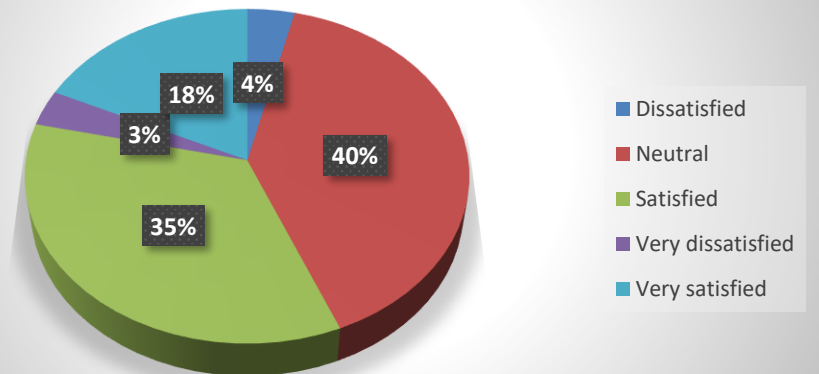

Infrastructure Facilities Cleanliness of Washrooms

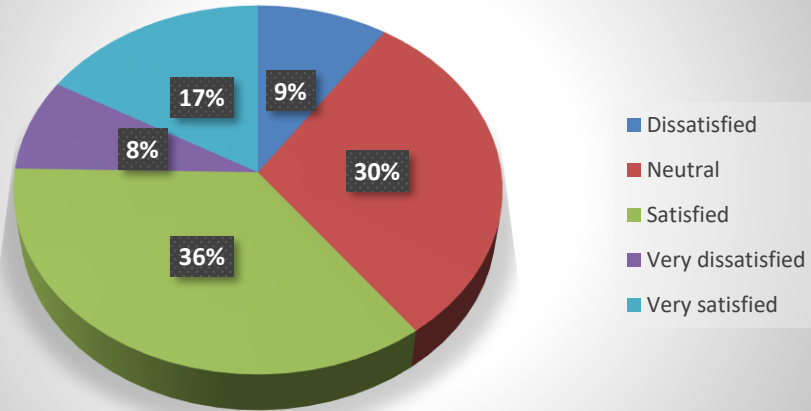

Infrastructure Facilities Drinking water facility

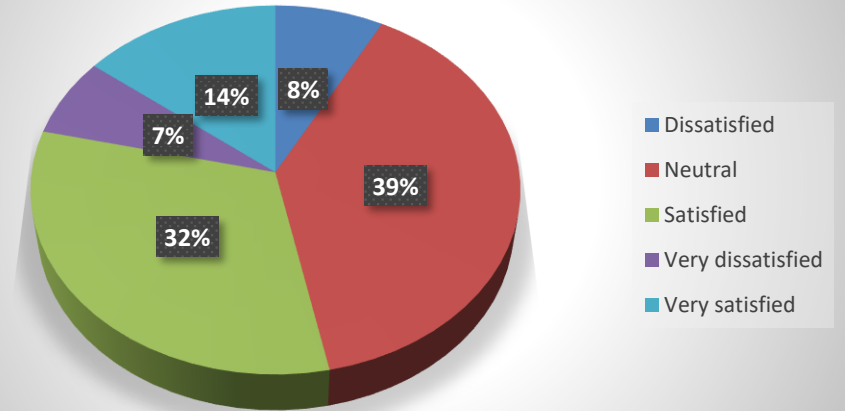

Infrastructure Facilities Facilities for Differently-abled Students

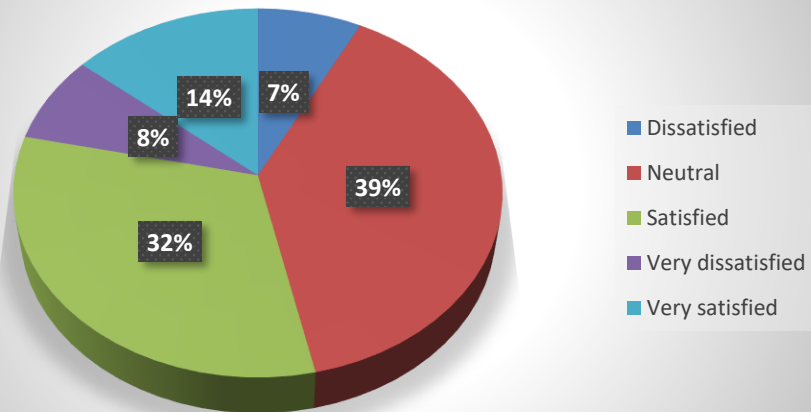

Infrastructure Facilities College website

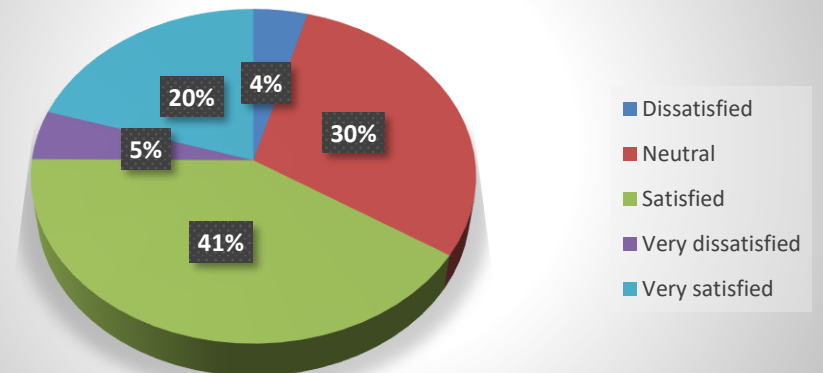

Infrastructure Facilities Medical Facilities with Doctor

Infrastructure Facilities Counselling Facility

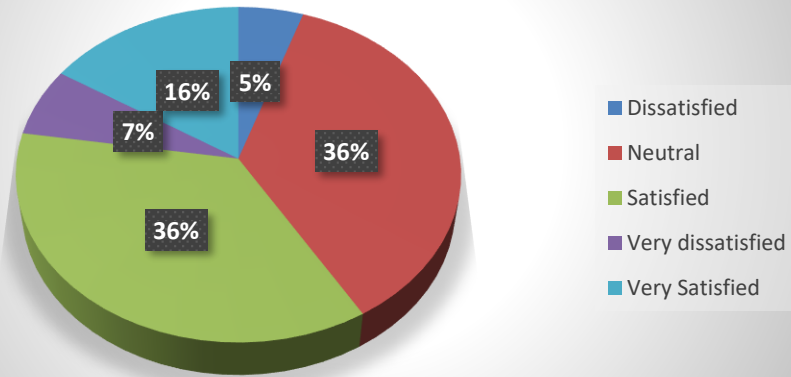

Infrastructure Facilities [Safe and secure campus (CCTV Surveillance System)]

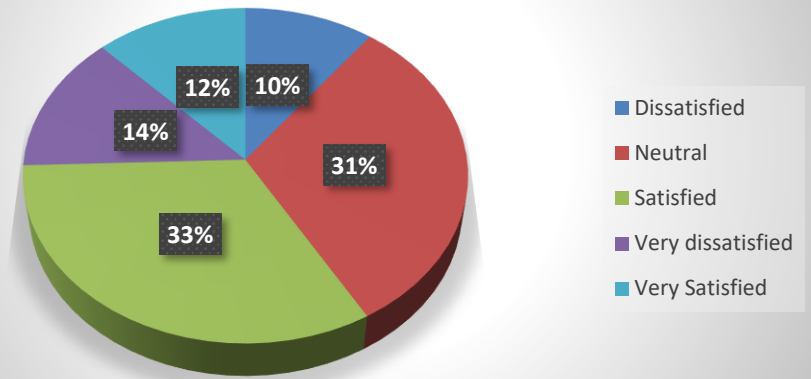

## **Part -4**

# **Administrative Staff**

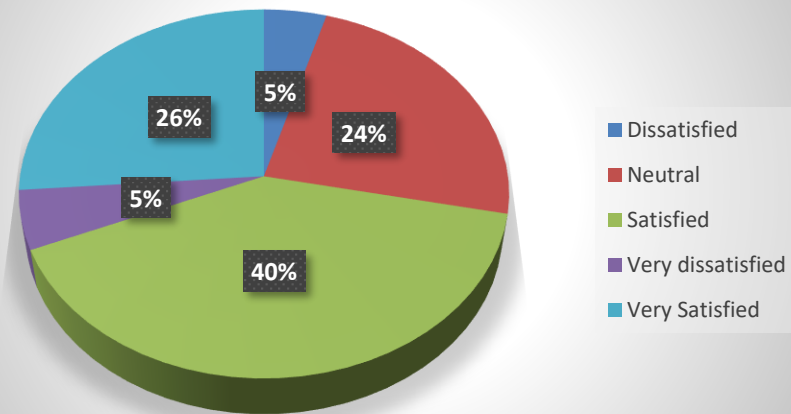

Administrative Staff Guidance and help from Laboratory Staff

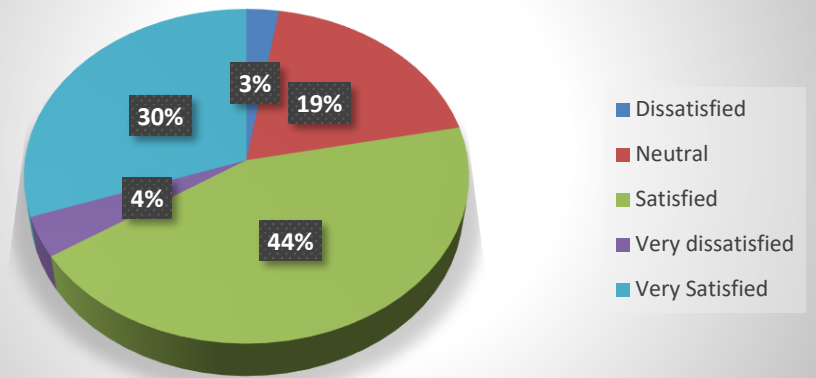

Administrative Staff Redressal of students' concern by Office Staff

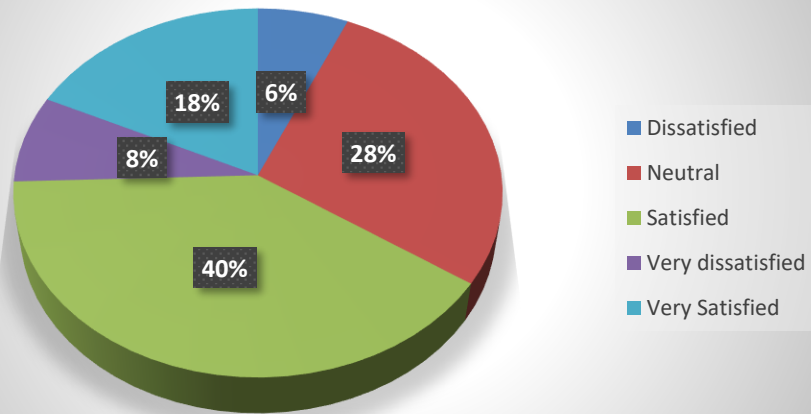

Administrative Staff Behavior of Security Staff

Administrative Staff Maintenance Staff (Gardener, Cleaning staff etc.)

Administrative Staff Support from Library Staff

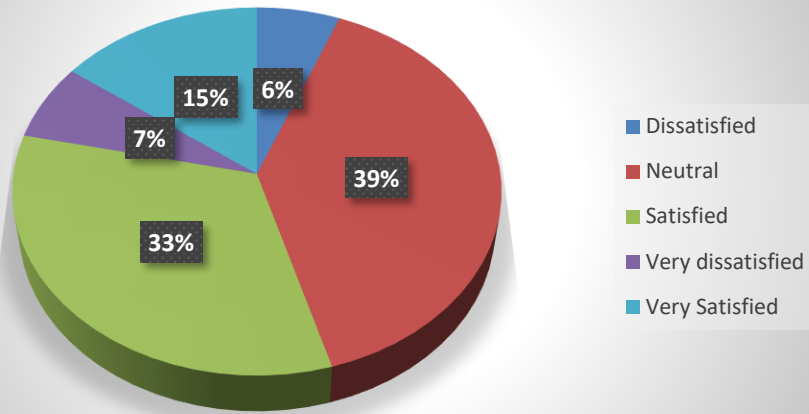

**Part -5**

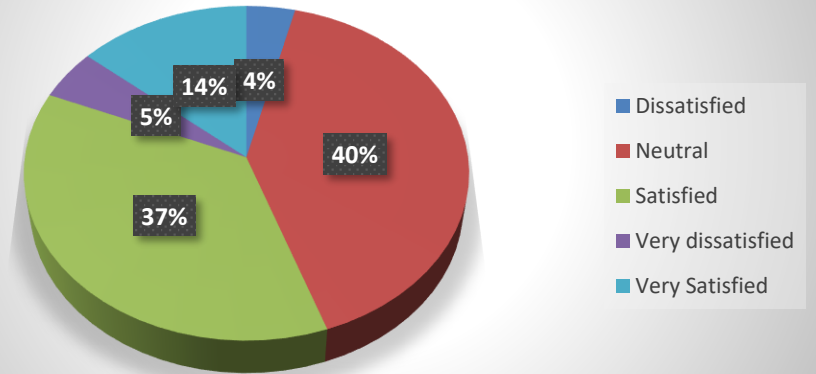

**Student Support**

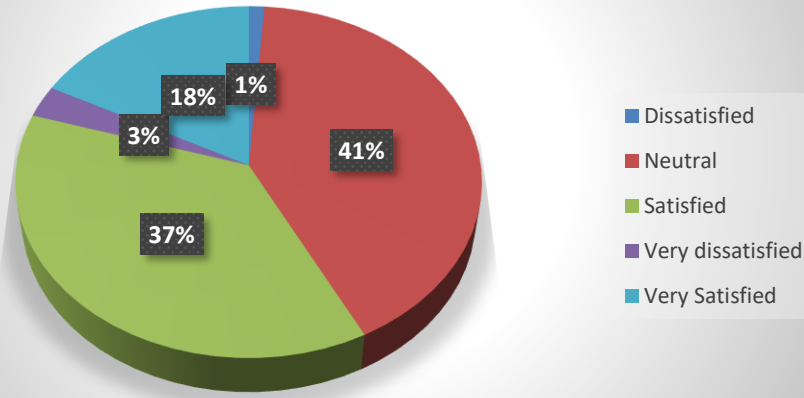

Student SupportStudents mentorship program

Student SupportStudent grievance redressal mechanism

Student SupportDealing with incidences of sexual harassment cases

# Summary

Suggestions regarding the ERP  
system introduced for Attendance,  
IA, extracurricular societies  
information and placement (app)

## **Positive Feedback:**

1. The app is considered a good initiative, aiding both students and teachers in maintaining discipline and punctuality.
2. Useful for tracking attendance records and academic information in a fair and transparent manner.
3. Helps students stay informed about their attendance and internal assessments.
4. Conceptually, the ERP system is a progressive step towards integrating attendance and academic tracking.
5. Features like notifications, marks display, and event tracking are appreciated.

## **Areas for Improvement:**

1. **Time Table Issues:**
  - Students traveling long distances face issues with large gaps between classes.
  - Classes should not have gaps longer than 1 hour to avoid wasting time.
2. **Attendance Criteria and Exemptions:**
  - Attendance exemptions should be considered for students preparing for competitive exams or living far from the college.
3. **Placement and Internship Opportunities:**
  - Limited opportunities for students in specific fields like microbiology.
  - Placement and internship notifications should be more frequent and accessible.
4. **Extracurricular Activities and Societies:**
  - Extracurricular attendance should be granted only for actual participation days, not randomly.
  - Society attendance is often not properly recorded or updated on the ERP.
  - The system should track and display society participation more transparently and timely.
5. **Technical and Functional Issues:**
  - The app frequently experiences glitches and bugs.
  - The ERP portal and app often show discrepancies in attendance and marks.
  - The user interface needs to be more user-friendly and easier to navigate.
  - Notifications are often delayed or not received, causing students to miss important updates.
  - Attendance should be marked and updated on the same day to avoid errors.
6. **Policy and Management Concerns:**
  - The system is perceived as restrictive, limiting students' ability to manage their time and explore other interests.
  - The ERP system has created stress among students due to its rigid attendance policies.
  - Some faculty members and administrative staff are unresponsive or rude about ERP-related issues.
  - The process for addressing discrepancies in attendance and marks is cumbersome and slow.
7. **General Improvements:**
  - The overall attendance percentage should be easily accessible on the app.

- Features from the ERP website should be integrated into the app.
- Regular maintenance and updates should be conducted to ensure smooth operation.
- More features like assignment tracking, performance analytics, and job listings should be added.
- The marking scheme for internal assessments should be transparent and accurately reflected on the portal.
- There should be a mechanism for submitting medical certificates and other documents through the app.
- The system should include notifications for administrative updates and academic schedules.

**Overall Summary:** While the ERP system is a step forward in integrating academic management, there are significant areas that require improvement, particularly in addressing technical glitches, improving user experience, and ensuring accurate and timely updates. Feedback suggests a need for more flexibility in attendance policies and better support for extracurricular activities and placements.
